+ **M**esures

# Proposed changes of membership

## Changes of membership:

- ◆ Simon Dignan, Australia, NMIA
- ◆ Vavrecka Lukàs, Czech Republic, CMI
- ◆ Siphò Dlamini, South Africa, NMISA
- ◆ Bulent Aydemir, Turkey, UME

## List of CCM WGFT members

FirstName	LastName	Country	Institute
		-	BIPM
Simon	Dignan	Australia	NMIA
Dietmar	Steindl	Austria	BEV
NN	NN	Belgium	Metrology Div
Rafael	Soares de Oliveira	Brazil	INMETRO
Zhimin	Zhang	China	NIM

# WG Meetings held since last CCM

- ◆ PTB in Braunschweig from 6th until 8th June 2017

[www.bipm.org](http://www.bipm.org)

- ◆ 2 hours meeting on 4th Sept. 2018 in Belfast during XXII. IMEKO World Congress

# KCs in Force completed and underway

## Summary of completed and approved KCs in Force

- ◆ CCM.F-K1.a (5 kN, 10 kN) & CCM.F-K1.b (5 kN), pilot: MIKES, 16 participants
- ◆ CCM.F-K2.a (50 kN, 100 kN) & CCM.F-K2.b (50 kN), pilot: NPL, 16 participants
- ◆ CCM.F-K3.a (0.5 MN, 1 MN) & CCM.F-K3.b (0.5 MN), pilot: PTB, 12 participants
- ◆ CCM.F-K4.a (2 MN, 4 MN) & CCM.F-K4.b (2 MN), pilot: NIST, 8 participants

In all KCs each pilot selected 4 transducers which are circulated in star type formation.

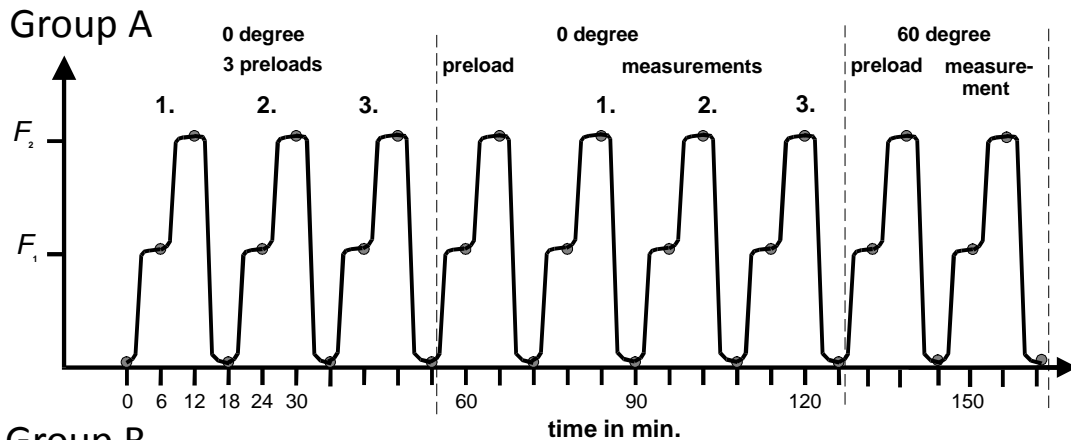

= > excellent results obtained,  
but a lot of work for pilot lab.

## KCs underway (measurements completed)

- ◆ CCM.F-K2.a.2  
(5 kN, 10 kN, 50 kN, 100 kN, 200 kN), NPL, PTB
- ◆ CCM.F-K3.1 (0.5 MN, 1 MN), PTB, KRIS

# KCs completed and underway, Measurement principle

1 preload +  
1 measurement  
cycle in position

60°	60°
120°	120°
180°	180°
240°	240°
300°	300°
360°/0°	360°
1.rotation	2.rotation

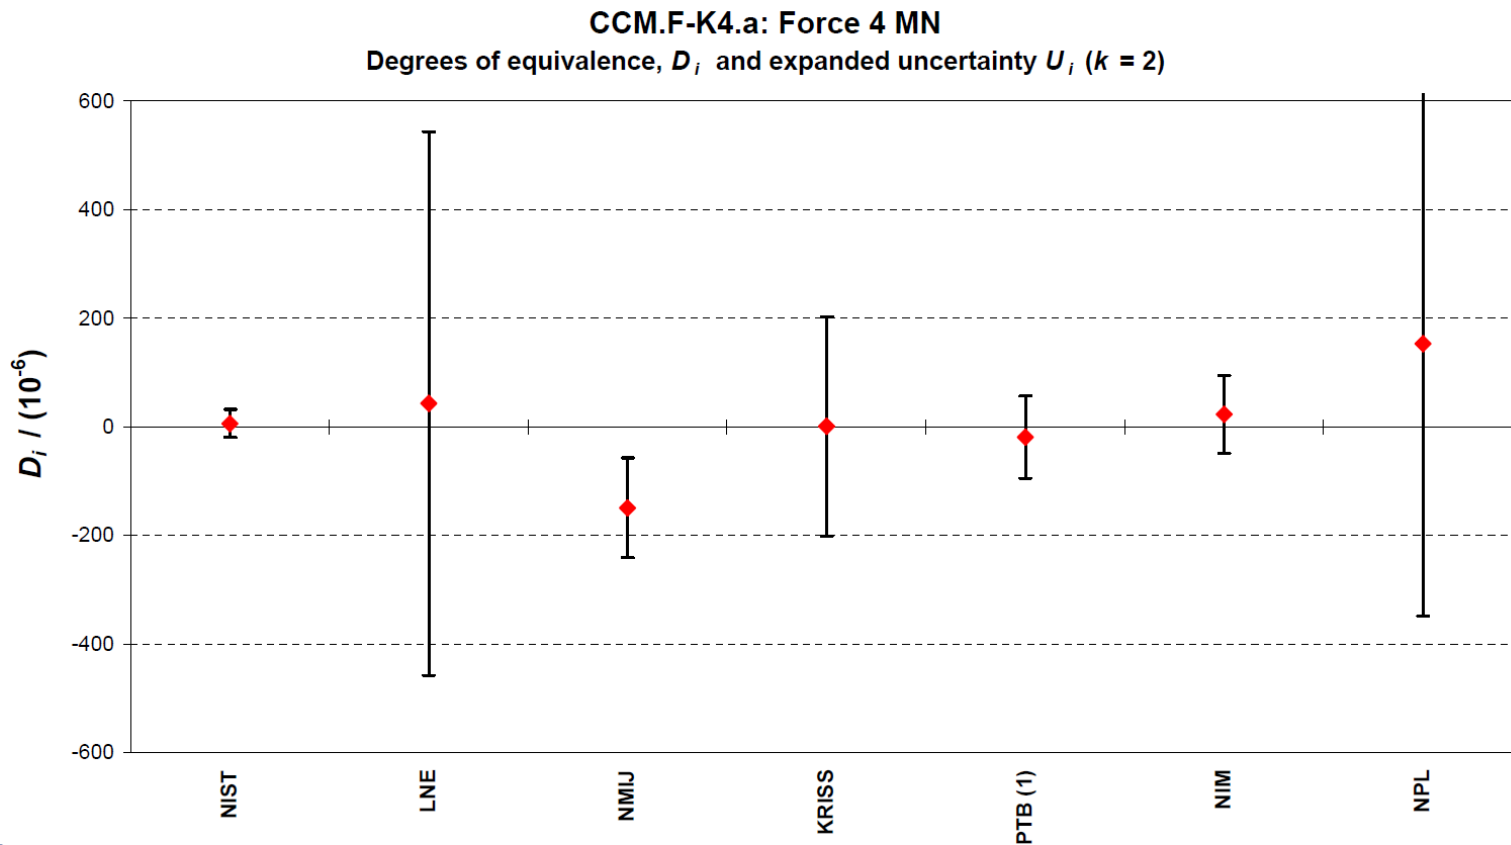

Deflection = reading - zero signal

3 measurements in 0 degree positions  
=> repeatability

12 measurements from 60 to 360 degree positions  
=> mean value + reproducibility

# KCs completed, approved for equivalence, results available

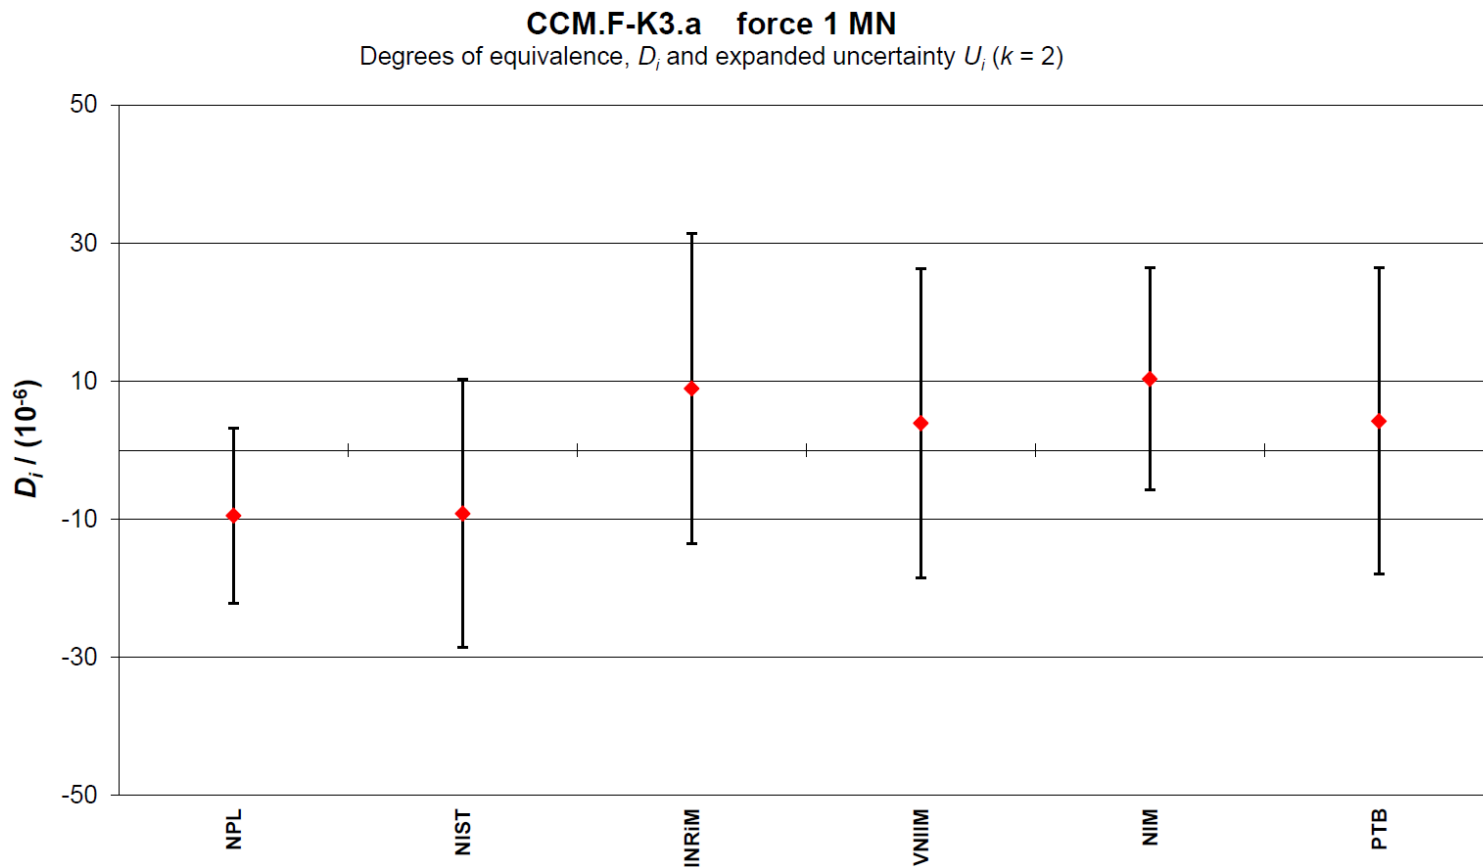

# KCs completed, approved for equivalence, results available

CCM.F-K4.a, CCM.F-K4.b, and APMP.M.F-K4.b: Force 2 MN  
Degrees of equivalence,  $D_i$  and expanded uncertainty  $U_i$  ( $k = 2$ )

# KCs completed, approved for equivalence, results available

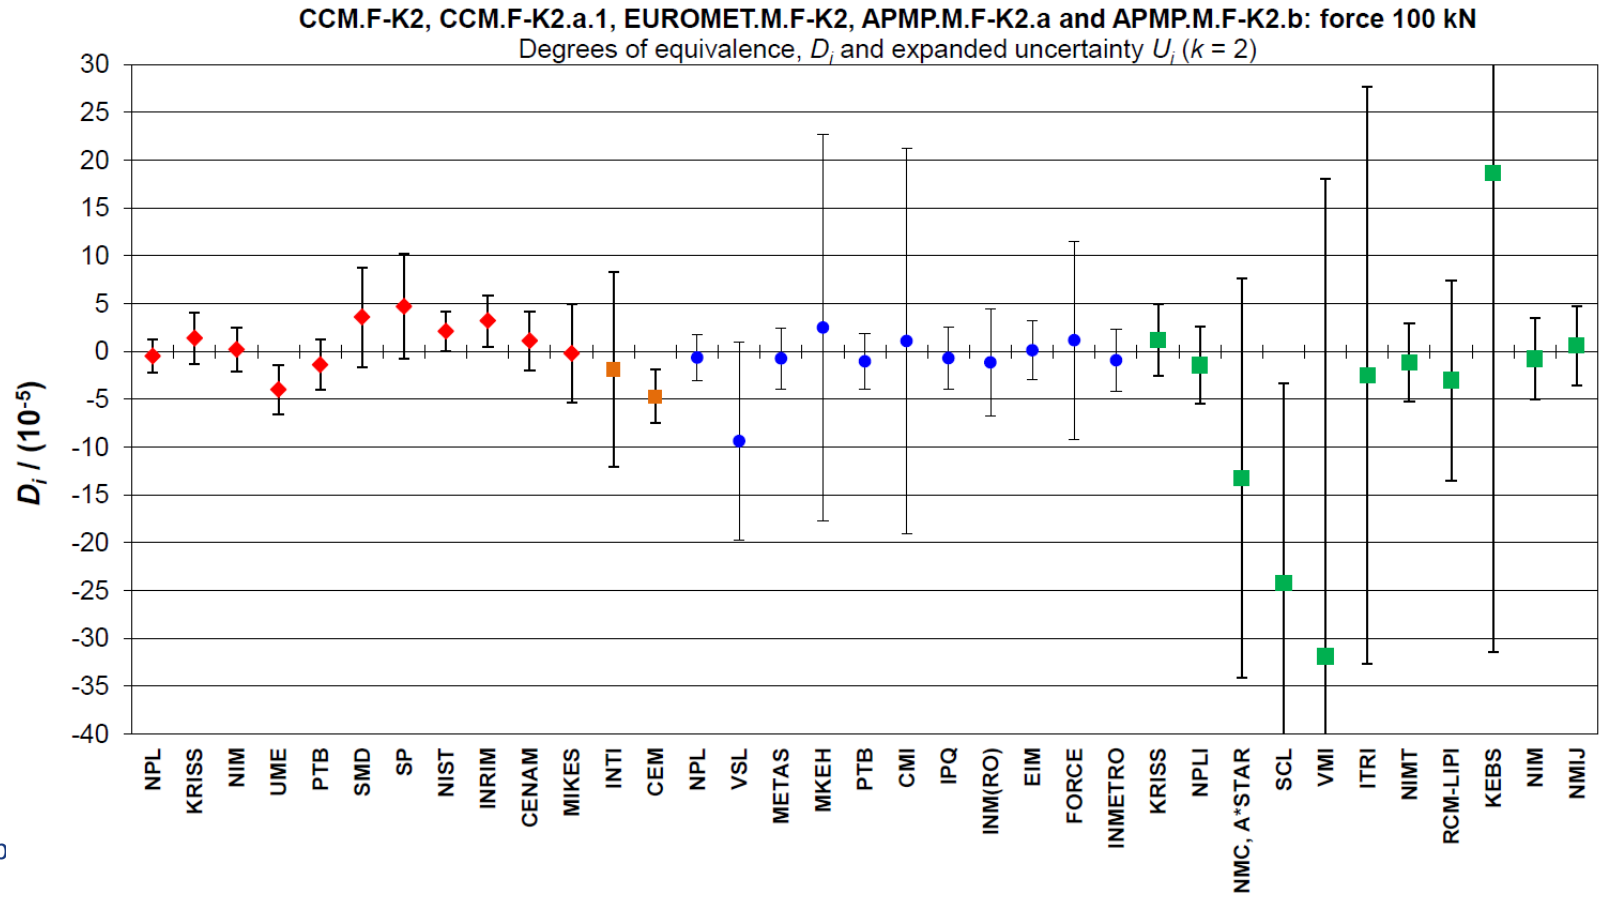

# KCs completed, approved for equivalence, results available

# KCs completed, approved for equivalence, results available

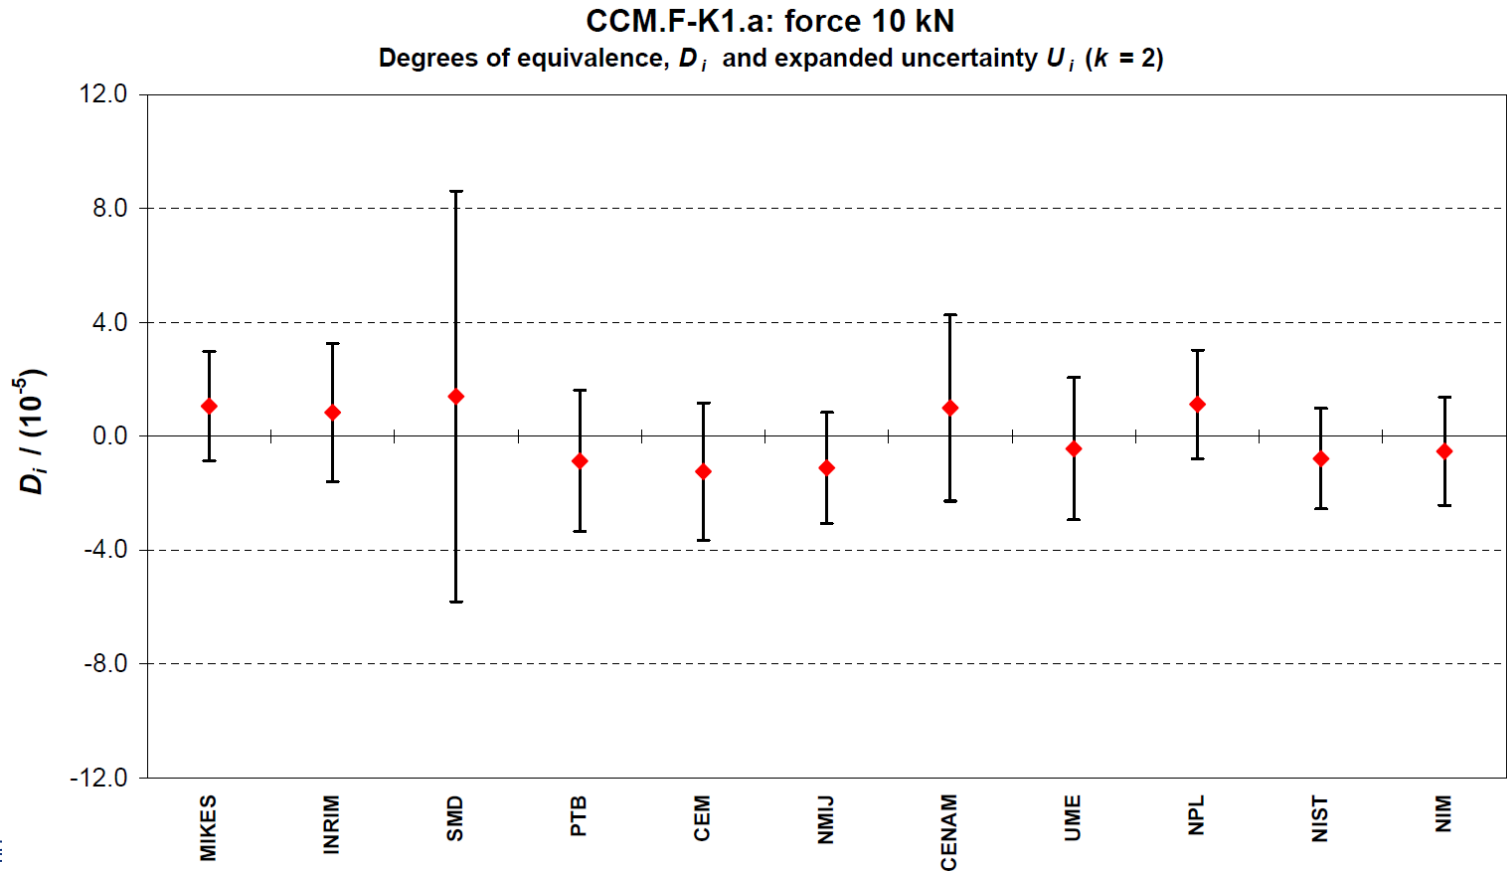

# KCs completed, approved for equivalence, results available

CCM.F-K2, CCM.F-K2.a.1, EUROMET.M-F-K2, APMP.M-F-K2.a and APMP.M-F-K2.b : force 50 kN  
Degrees of equivalence,  $D_i$  and expanded uncertainty  $U_i$  ( $k = 2$ )

# KCs completed, approved for equivalence, results available

# KCs completed, approved for equivalence, results available

# RMO Force key and supplementary comparisons

- APMP.M.F-K2.a and b (force transducer 50 kN, 100 kN), Pilot: KRISS, 13 participants  
Approved for equivalence, Results available
- APMP.M.F-K3.a (force transducer 500 kN, 1000 kN), Pilot: NIM  
In progress, Measurements completed
- APMP.M.F-K3.b (force transducer 500 kN), Pilot: NIM  
In progress, Measurements completed
- APMP.M.F-S2.1 (force transducer 100 kN), Pilot: KRISS, VMI (Vietnam)  
Planned
- APMP.M.F-K4.b (force transducer 2000 kN), Pilot: NMIJ  
Approved for equivalence, Results available
- AFRIMET.M.F-S1 (force transducer 2 kN to 100 kN)  
In progress, Measurements completed, Participants: PTB, KEBS (Kenya)
- AFRIMET.M.F-S2 (force transducer 250 kN and 500 kN)  
In progress: Measurements started, Participants: KEBS (Kenya), PTB, NMISA (South Africa)

# RMO Force key and supplementary comparisons

- COOMET.M.F-S1 (Force: 20 kN, 50 kN, 100 kN, 250 kN, 500 kN, 1000 kN and 2000 kN)  
Report in progress, Draft B
- COOMET.M.F-S2 (Force: 10 kN, 14 kN, 16 kN, 20 kN, 50 kN, 60 kN, 80 kN and 100 kN)  
Approved and published
- EUROMET.M.F-K1 (force transducer 5 kN, 10 kN), Report in progress, Draft B, Pilot: MIKES
- EUROMET.M.F-K2 (force transducer 50 kN, 100 kN)  
Approved for equivalence, Results available, Pilot: NPL
- EUROMET.M.F-K3 (force transducer 500 kN, 1000 kN, 2 MN, 4 MN)  
In progress, Measurements 500 kN, 1000 kN to be finished in 2019, Pilot: PTB, 16 participants
- EURAMET.M.F-S5 (10kN to 500 kN) Pilot: NPL, FSB-LIMS (Croatia), Protocol completed
- GULFMET.M.F.-S1 (force comparison 40 kN to 1 MN), Report in progress, Draft A,  
Participants: UME (Turkey), SASO-NMCC (Saudi Arabia), QCC-EMI (United Arab Emirates)
- GULFMET.M.F-S2 ( force comparison 0.4 kN to 100 kN)  
Report in progress, Draft B, Participants: UME (Turkey), SASO-NMCC (Saudi Arabia)

# RMO Force key and supplementary comparisons

- SIM.M.F-S1 (Calibration of a force testing machine in compression, Force: 10 kN to 100 kN)  
Approved and published
- SIM.M.F-S2 (Calibration of a force testing machine in compression, Force: 10 kN to 100 kN)  
Draft A, Participants: IDIC (Chile), CENAMEP AIP (Panama)
- SIM.M.F-S3 (Charpy V-notch reference specimen: 20 J and 100 J)  
Report in progress, Draft B
- SIM.M.F-S4 (force transducer 50 kN, 100 kN)  
In progress
- SIM.M.F-S5 Comparison of force testing machines  
Approved and published
- SIM.M.F-S6 Comparison of force testing machines 10 kN to 100 kN  
Draft A, Participants: IDIC (Chile), INTN (Paraguay)
- SIM.M.F-S7 (force comparison 500 kN to 1000 kN)  
Measurements completed, Participants: INMETRO (Brazil), IDIC (Chile)
- SIM.M.F-S8 (comparison of force testing machines 20 kN to 100 kN)  
Measurements completed, Participants: IDIC (Chile), IBMETRO (Bolivia)

# KCs completed: Summary of approved KCs in Torque

---

- ◆ CCM.T-K1 (500 N m, 1000 N m), pilot: PTB, 8 participants
- ◆ CCM.T-K1.1 (500 N m, 1000 N m), PTB, NPLI
- ◆ CCM.T-K1.2 (500 N m, 1000 N m), PTB, NIMT
- ◆ CCM.T-K1.3 (500 N m, 1000 N m), PTB, NIS
- ◆ CCM.T-K2 (10 kN m, 20 kN m), pilot: PTB, 4 participants

Same measurement principle like force comparison in group A.

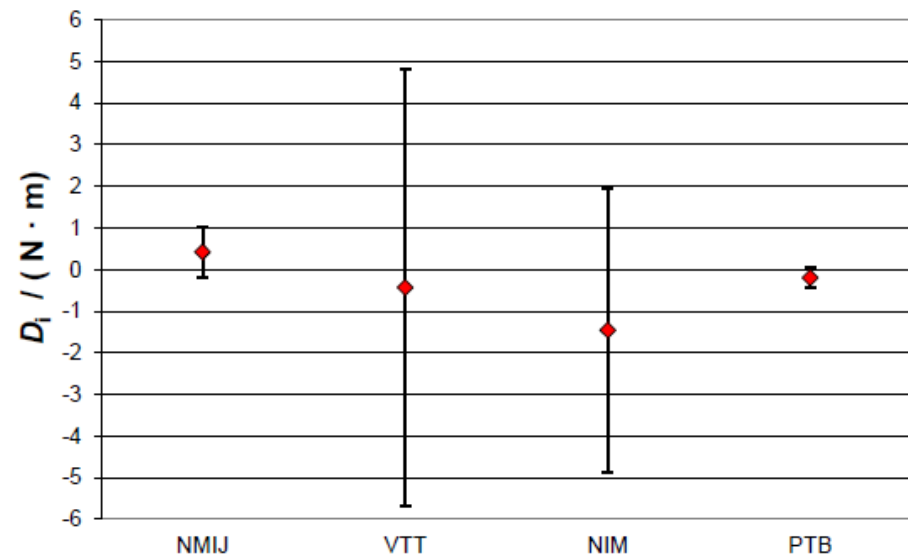

For each KC the pilot selected 2 transducers which are measured in 2 torque steps clockwise and anticlockwise

⇒ excellent results obtained, but a lot of work for the pilot.

⇒ Future plan for torque comparisons ?

# KCs completed, approved for equivalence, results available

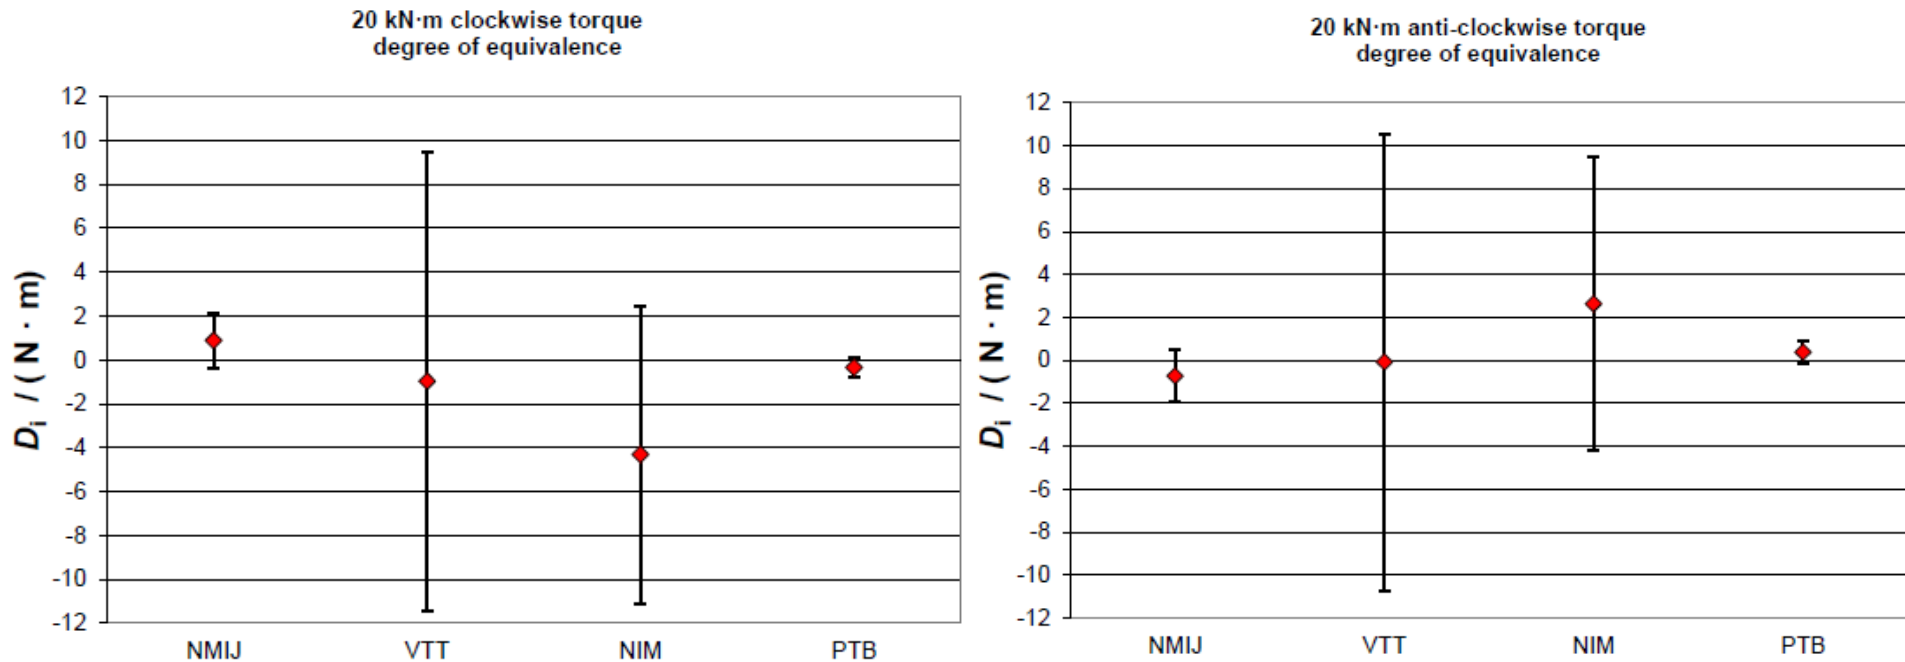

10 kN·m clockwise torque  
degree of equivalence

10 kN·m anti-clockwise torque  
degree of equivalence

# KCs completed, approved for equivalence, results available

# KCs completed, approved for equivalence, results available

CCM.T-K1, CCM.T-K1.1, CCM.T-K1.2 and CCM.T-K1.3:  
Nominal torque  $T_{nom} = 500 \text{ N}\cdot\text{m}$  (clockwise)  
Degrees of equivalence,  $D_i$ , and expanded uncertainties ( $k = 2$ )  $U_i$ , expressed in  $\text{mN}\cdot\text{m}$

# KCs completed, approved for equivalence, results available

CCM.T-K1, CCM.T-K1.1, CCM.T-K1.2, and CCM.T-K1.3:  
Nominal torque  $T_{nom} = 500 \text{ N}\cdot\text{m}$  (anti-clockwise)  
Degrees of equivalence,  $D_i$ , and expanded uncertainties ( $k = 2$ )  $U_i$ , expressed in  $\text{mN}\cdot\text{m}$

Red diamonds: TB2  
Green diamond: TB2, participant in CCM.T-K1.1  
Blue diamond: TB2, participant in CCM.T-K1.2  
Orange triangle: participant in CCM.T-K1.3  
Red squares: TT1  
Green square: TT1, participant in CCM.T-K1.1  
Blue square: TT1, participant in CCM.T-K1.2

# KCs completed, approved for equivalence, results available

CCM.T-K1, CCM.T-K1.1, CCM.T-K1.2, and CCM.T-K1.3:  
Nominal torque  $T_{\text{nom}} = 1000 \text{ N}\cdot\text{m}$  (clockwise)  
Degrees of equivalence,  $D_i$ , and expanded uncertainties ( $k = 2$ )  $U_i$ , expressed in  $\text{mN}\cdot\text{m}$

- Red diamonds: TB2
- Green diamond: TB2, participant in CCM.T-K1.1
- Blue diamond: TB2, participant in CCM.T-K1.2
- Orange triangle: participant in CCM.T-K1.3
- Red squares: TT1
- Green square: TT1, participant in CCM.T-K1.1
- Blue square: TT1, participant in CCM.T-K1.2

# KCs completed, approved for equivalence, results available

CCM.T-K1, CCM.T-K1.1, CCM.T-K1.2, and CCM.T-K1.3:  
Nominal torque  $T_{nom} = 1000 \text{ N}\cdot\text{m}$  (anti-clockwise)  
Degrees of equivalence,  $D_i$ , and expanded uncertainties ( $k = 2$ )  $U_i$ , expressed in  $\text{mN}\cdot\text{m}$

- Green square: TT1, participant in CCM.T-K1.1
- Blue square: TT1, participant in CCM.T-K1.2

# RMO Torque key and supplementary comparisons

---

- [APMP.M.T- K1](#) Pilot: KRISS, 6 participants  
2015 – 2016, 500 N·m, 1000 N·m, Planned
- [APMP.M.T-S1](#)  
2016, 1 kN·m to 2 kN·m, Approved and published
- [COOMET.M.T- S1](#)  
2012 – 2014, 100 N·m to 2500 N·m, Approved and published
- [EURAMET.M.T- S1](#)  
2008, 1 N·m, 5 N·m, 10 N·m, 50 N·m, 200 N·m, 500 N·m, and 1000 N·m,  
Approved and published
- [EURAMET.M.T- S2](#)  
2008, 10 N·m, 20 N·m, 40 N·m, 60 N·m, 80 N·m, and 100 N·m, ), Approved  
and published
- [EURAMET.M.T- S3](#)  
2010, 10 N·m, 20 N·m, ... 1 kN·m (torque wrenches), Approved and published

# RMO Torque key and supplementary comparisons

---

- [EURAMET.M.T- S4](#), participants: PTB, LNE  
2015, 5 N·m, ... 50 N·m, measurement completed
- [EURAMET.M.T- S5](#), participants: PTB, LNE  
2017, 5000 N·m, planned
- [SIM.M.T-S1](#)  
2016, 10 Nm, 20 Nm and 50 Nm, in progress

# Main actions taken and main achievements

## ◆ Agreed Plan of CCM KCs in Force and Torque

Quantity	Key Comparison	Measurement Points	Years for repeating	Time Schedule	Covered Range
Force	CCM.F-K__	200 N, 500 N	15-20	2018	10 N – 1000 N
Force	CCM.F-K1	5 kN, 10 kN	15-20	2021	1 kN – 20 kN
Force	CCM.F-K2	50 kN, 100 kN	15-20	2027	20 kN – 200 kN
Force	CCM.F-K3	500 kN, 1000 kN	15-20	2030	200 kN – 1000 kN
Force	CCM.F-K4	2 MN, 4 MN	15-20	2024	1 MN – 20 MN
Torque	CCM.T-K1	500 N·m, 1000 N·m	15-20	2022	100 N·m, 5 kN·m
Torque	CCM.T-K2	10 kN·m, 20 kN·m	15-20	2025	5 kN·m, 100 kN·m

# KCs planed: 200 N and 500 N Force Key Comparison

- ◆ Force Key Comparison CCM.F-KXX to be registered in next weeks
- ◆ Measurand: Force 200 N and 500 N
- ◆ Pilot Laboratory: METAS
- ◆ Contact Person: Dr. Christian Wuethrich
- ◆ Protocol Draft Version distributed to participants for comments
- ◆ Participants from APMP, COOMET, EURAMET, SIM:  
CENAM, INRIM, KRIS, LNE, METAS, NIM, NIST, NMIJ, NPL, PTB, UMS ? , VNIIM ?
- ◆ Measurement time schedule: July 2019 – June 2020
- ◆ **New principle: Each participants brings the own device** (2 or 4 force transducers, DMP, BN 100)
- ◆ 500 N transfer standards with 2 force steps: 200 N, 500 N
- ◆ 200 N transfer standard with 1 force step: 200 N
- ◆ DMP 40 or DMP 41 and BN 100 to verify DMP stability
- ◆ 2 rotations of 360 degrees
- ◆ 4 min time interval
- ◆ Pilot uses same deadweight force standard machine with 200 N and 500 N steps for all measurements.

# Terms of reference of CCM WG Force and Torque

---

- ◆ To study issues related to force and torque metrology, including dissemination, and to advise the CCM on these topics as well as on anticipated developments in this field;
- ◆ To review the results of completed key and supplementary comparisons and plan and support new comparisons;
- ◆ To facilitate the submission and review of CMCs by establishing technical review criteria and service categories and providing guidance on and coordinating the review process;
- ◆ To provide liaison at the technical level with ISO TC164/SC 1 and SC 4 and to maintain good links with IMEKO TC3.

# Liaison & stakeholders of CCM WGFT

---

- ◆ All RMOs are involved
- ◆ ISO TC164/SC 1 and SC 4
- ◆ Industry in force and torque measurement
- ◆ IMEKO TC3

# Progressing the state of the art

---

- ◆ Members of CCM WGFT are involved in research
- ◆ Development in large force (EMRP SIB63)  
<https://www.ptb.de/emrp/forcemetrology.html>
- ◆ Development in large torque (EMPIR 14IND14 MNm Torque)  
<https://www.ptb.de/emrp/ind14-home.html>
- ◆ Development in small force and torque (IMEKO publications)
- ◆ Consequences of SI redefinition on force and torque, in particular small force and torque (IMEKO publications)
- ◆ Multicomponent force and torque measurements
- ◆ Dynamic force measurement (new EMPIR 18SIB08 “ComTraForce” project)
- ◆ Torque measurement for Energy (new EMPIR proposal WindEfficiency)

# Program of work for the next 5 years

---

- ◆ 200 N and 500 N Key Comparison  
measurements completed until mean of 2020  
Evaluation of 200 N and 500 N comparison in 2020/2021
- ◆ Harmonisation and review criteria for CMC in force and torque  
in 2020/2021
- ◆ Start of new CCM.F-K1 5 kN, 10 kN force comparison in 2021
- ◆ Start of new CCM.T-K1 500 N m, 1000 N m comparison in 2022
- ◆ Definition of other KCs in force and torque

# WG Meetings planned

- ◆ NIST in Gaithersburg in autumn 2020

topics:

- new 200 N, 500 N key comparison, CCM.F\_\_  
measurement results and evaluation of results

- decision on new comparisons in force and torque  
pilot for CCM-F-K1 & CCM.T-K1 ?

- CMCs in force and torque  
guideline for harmonisation and review criteria

Future topics of CCM WGFT:

- dynamic force and torque
- small force and torque
- Workshop with scientific contributions

- ◆ XXIII. IMEKO WC 2021 in Yokohama, perhaps short meeting?
- ◆ KRISS in Daejon in 2023

NIST's 4.45-million Newton  
deadweight force standard machine

Thank you.
