

NIST STATION REPORT

T. E. Parker

National Institute of Standards and Technology

Time and Frequency Division

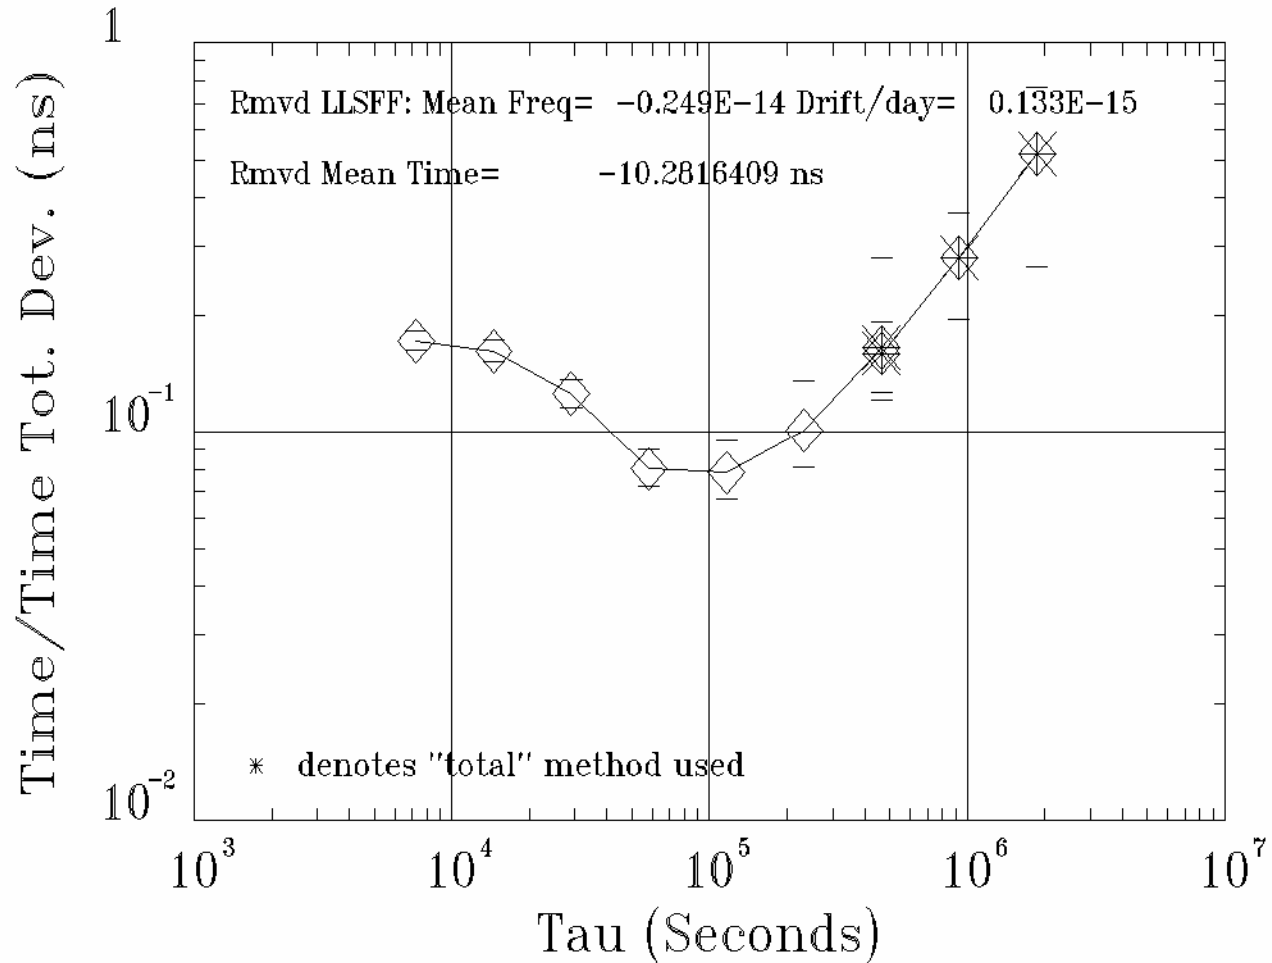

TWSTFT Working Group

September 10-12, 2006

Recent TWSTFT Data

NIST-NPL

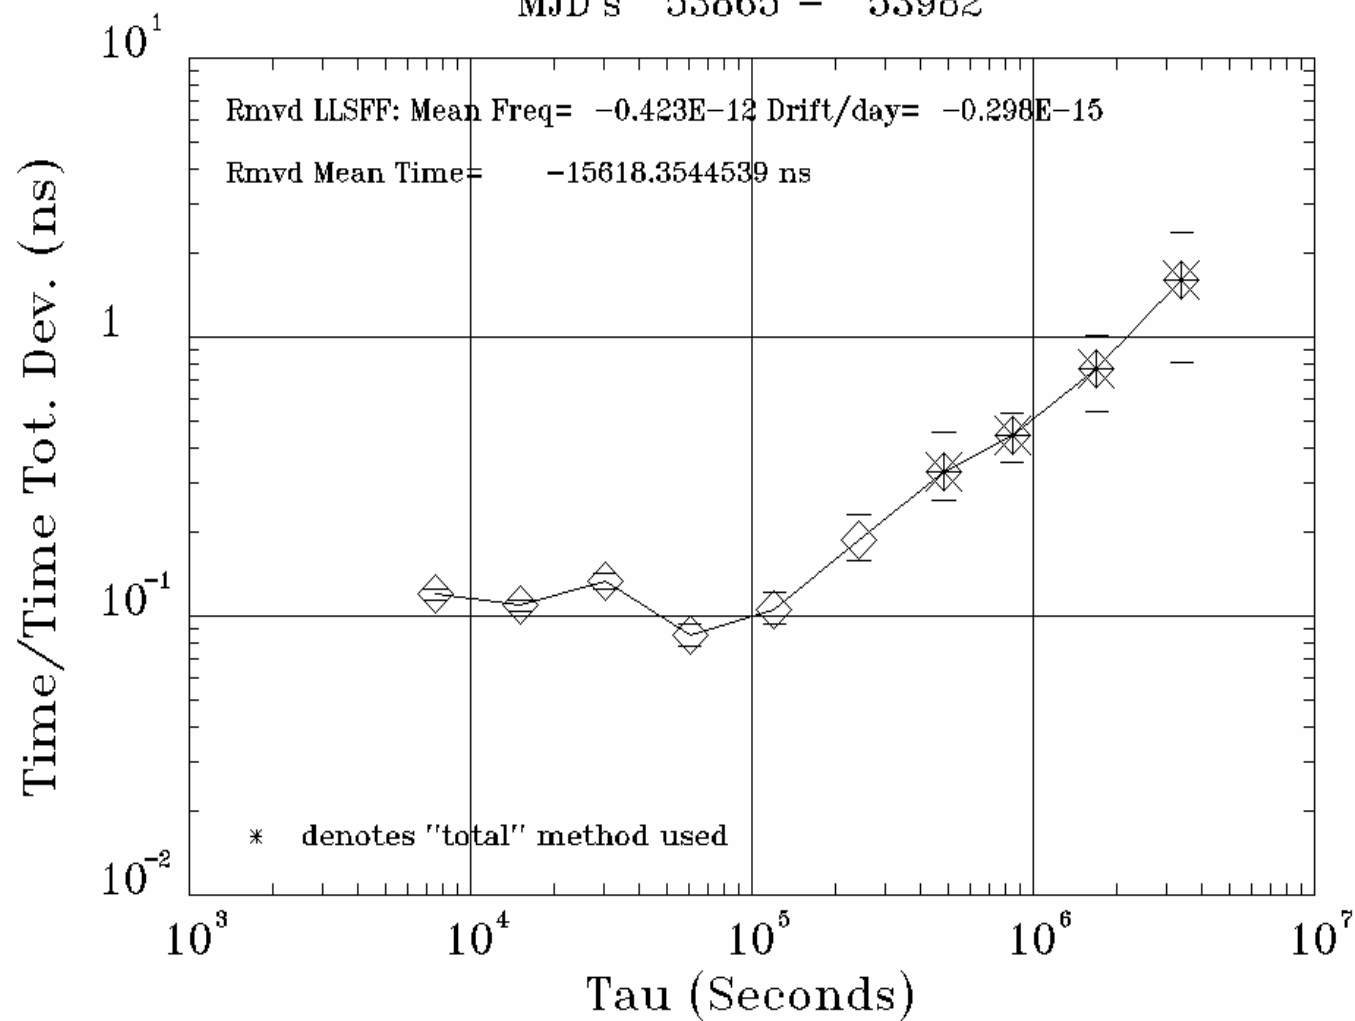

MJD's 53891 - 53955

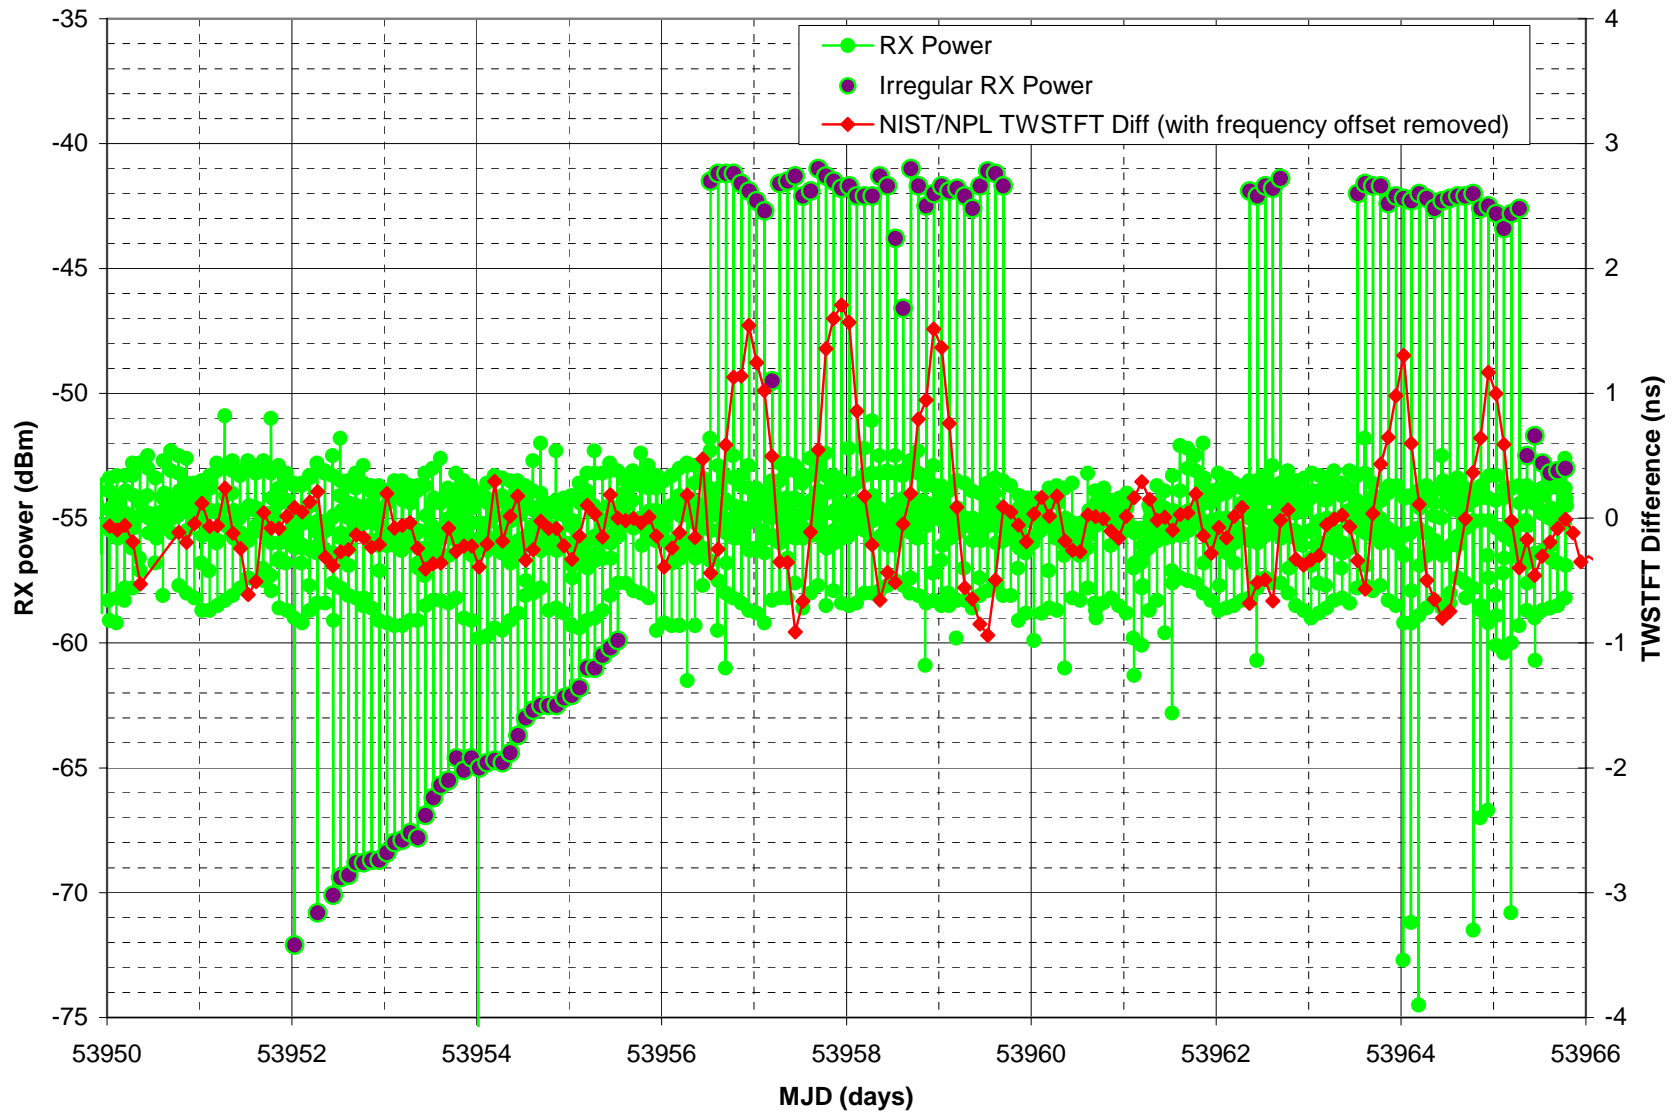

Recent TWSTFT Data

NIST – OPHmaser

MJD's 53865 – 53982

A Problem

Some Comments

- Now that we are paying lots of money for transatlantic two-way, NIST management will be observing the performance closely.
- NIST will be monitoring signal levels, carrier to noise, and frequencies on Europe to North America signals.
- Would be very useful if one of the European stations did the same for the North America to Europe signals.
- Need an emergency contact list for all stations.
